dairy cows**

buta-cup^{ufac} extra

A unique fat supplement for efficient butterfat production in dairy cows.

buta-cup extra is a specific balanced blend of fatty acids derived from highly digestible oils and C16:0 fats combined with glycerine to give a highly palatable free-flowing meal. It is designed to boost milk yield & butter fat. Enabling the cows to milk to their potential and maximising the milk contract's value.

Key Features:

- ✓ Reduces heating in the TMR
- ✓ Contains soft highly digestible oils
- ✓ Being rumen inert, can be included with NO risk of acidosis
- ✓ Contains C16:0 Palm oil
- ✓ Contains high level of glycerene

Dairy

Yield

Butterfat

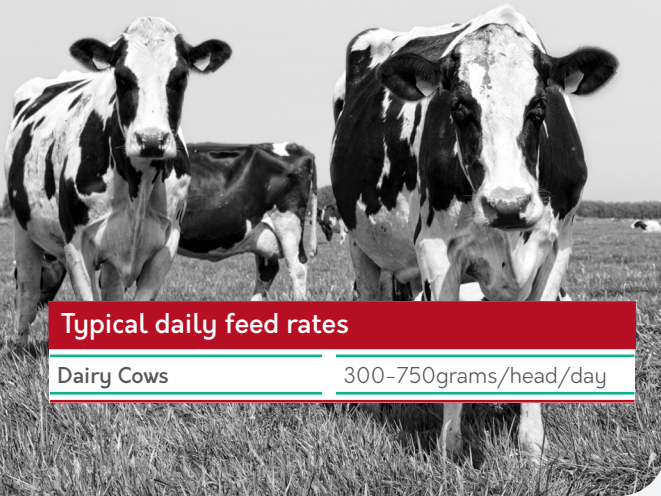

Responsibly
Sourced
Palm Oil

Made in
the UK

Key Benefits:

- ✓ Glycerene is an efficient precursor of glucose and is used directly by the liver
- ✓ Has a direct affect on the efficacy of fat utilisation
- ✓ Increases energy utilisation
- ✓ Maintains/increases butterfat
- ✓ Boosts energy intakes, reducing risk of body condition loss
- ✓ Glycerene acts as a preservative & helps maintain ration quality with no risk of acidosis
- ✓ Provides essential fatty acids

Typical daily feed rates

Dairy Cows

300-750grams/head/day
