

A balanced supplement for transition and early lactating cows **for improved dry matter intakes, liver function, and boosts immune system.**

Key Features:

- ✓ Contains high levels of C18:1 fatty acid
- ✓ Supplies highly digestible Omega 6 Linoleic fatty acid
- ✓ Provides Omega 3 Fatty acids EPA and DHA from marine oil
- ✓ Contains soft, highly digestible oils
- ✓ Provides rumen inert methionine
- ✓ Supplies rumen inert choline
- ✓ Includes Vitamin E and Selenium

A balanced supplement for transition and early lactating cows. It improves dry matter intakes, liver function and boosts the immune system, help cows to settle into lactation.

Effective transition management should focus on minimising stress while providing a balanced mix of the nutrients required to reduce metabolic problems and support cow health, fertility and productivity.

Key Benefits:

- ✓ Highly digestible energy source
- ✓ Predominantly from C18:1 to reduce the amount of time the cow spends in negative energy status
- ✓ Inclusion of Glycerene provides additional glucogenic energy reducing the risk of subclinical ketosis
- ✓ Liver function is enhanced by the inclusion of rumen inert choline chloride
- ✓ Includes methionine, the first limiting amino acid to increase milk production and efficiency of nitrogen use
- ✓ Supplies selenium and vitamin E for protection against peroxidative degradation
- ✓ Suggested feeding 21 days pre partum & 120 days post
