cholymet^{ufac}

cholymet is a granular, free-flowing rumen-inert dairy cow supplement, here to transform how we feed our livestock.

cholymet is an innovative precursor to reducing our reliance on soya bean meal in ruminant animal feed and offers a more sustainable alternative that promises healthier, more productive dairy cows.

Key Features:

- ✔ Helps meet the amino acid requirements of transition & early lactation dairy cows while reducing total crude protein being fed
- ✔ Reduces metabolic stress at the most critical time of the cow's production cycle

Dairy

Milk Yield

Health

Growth

Fertility

Made in the UK

Eco Friendly

No Soya

Key Benefits:

- ✔ Improves milk yield
- ✔ Increase total milk solids (butterfat and protein)
- ✔ Reduces oxidative stress & negative energy balance (NEB)
- ✔ Boosts the immune system
- ✔ Boosts the reproductive system
- ✔ Increase protein utilisation
- ✔ Improves feed conversion efficiency (FCE)
- ✔ Partial replacement for Soya

Typical daily feed rates

Dairy Cows	100-150 grams/head/day
